Undertow: Polls + Qloo blend vs. poll-based forecast, 2026 Senate

Race calls: 33 called races

	Right	Wrong
Polls + Qloo blend	**32**	1: South Carolina
Betting markets	**31**	2: Iowa, South Carolina
Poll-based forecast	**31**	2: Iowa, South Carolina

Democratic seats

	Called wrong or left out	Effect	Total
Actual so far	Alaska and Mississippi uncalled		**54**
Polls + Qloo blend	South Carolina	-1	**53**
Poll-based forecast	Iowa, South Carolina	-2	**53**

The poll-based forecast's 53 includes Alaska, which is uncalled and not in the actual 54. The Polls + Qloo blend has no Alaska number, so its 53 does not include it.

If Mississippi and Alaska go either way

Both are too close to call. Colom led Mississippi by 43 votes (about 96% counted), and Peltola led Alaska by 626 (about 74% counted).

Mississippi winner	Alaska winner	Final Senate (D-R)	Polls + Qloo blend calls right	Poll-based calls right
Hyde-Smith (R)	Sullivan (R)	54-46	33 of 34	32 of 35
Hyde-Smith (R)	Peltola (D)	55-45	33 of 34	33 of 35
Colom (D)	Sullivan (R)	55-45	32 of 34	31 of 35
Colom (D)	Peltola (D)	56-44	32 of 34	32 of 35

The Polls + Qloo blend has no Alaska number, so it is scored on 34 races. Results as of Fox News, last updated 12:23pm ET, Nov 4, 2026.

Every prediction, side by side

35 Senate races. The markets back our pick in 35 of 35 races they cover. The blend column is half our poll-based call, half Qloo: in 2024 that mix called 7 of 8 close states, against 6 for the polls alone.

The Result column and the Right and Wrong labels were added after the election. The forecast numbers are unchanged. D+ and R+ show the margin in points.

Notes

The blend is half polls forecast and half Qloo-only.

Scored on the winner only, from Fox News, last updated 12:23pm ET, Nov 4, 2026. The poll-based forecast is mainly polls, but also weighs pollster skew, the 2024 result and race ratings.
